

Press release
TUM TALK IN HEILBRONN

“TUM. Think • Understand • Manage”:

Fourth edition of the TUM TALK discussion forum in Heilbronn on October 25, 2023

Under the motto **TUM. Think • Understand • Manage**, the Technical University of Munich is once again inviting successful entrepreneurs and renowned scientists to discuss relevant success factors and current challenges on October 25. Knowledge and insights emerge from the constant exchange of bright minds. The TUM TALK offers orientation and inspiration on current, relevant issues. Because cutting-edge scientific research can provide important foundations for informed decisions.

The TUM TALK brings together scientists, entrepreneurs and top managers. At the fourth edition, the top-class panel will talk about the skilled workers of the future, demographic and societal factors of the shortage of skilled workers, and smart and sustainable recruiting, human resources, and continuing education strategies of companies. Moderated by **Prof. Dr. Helmut Krcmar**, Founding Dean and President's Representative for the TUM Campus Heilbronn, the panel will include **Dr. Stefanie Leiterholt**, President Human Resources & Legal at WMF, **Dr. Stefan Wolf**, President of Gesamtmetall and longstanding CEO of ElringKlinger, **Jutta Balletshofer**, HR Lead for Europe and Canada at Organon, **Roland Hehn**, HR Director of Schwarz Dienstleistungen, and **Angela Todisco**, Head of Human Resources EMEA North at SAP.

This year's TUM TALK will also feature short presentations to provide scientific impetus for the growing interface between artificial intelligence and the labor market by **Chris Russell**, Professor of Artificial Intelligence, Government and Policy at the Oxford Internet Institute, **Stephan Krusche**, Professor of Software Development at the Technical University of Munich, and **Johannes Gölz**, a PhD student at the TUM Chair of Professor Dr. Jens Förderer.

The Technical University of Munich is one of the most renowned universities in Europe. More than 600 professors conduct research in their disciplines on findings that can improve the world of tomorrow. **The TU Munich has a total of close to 50,000 students, around 570 of whom study in Heilbronn.**
